December 14, 2005

Bryant Hill
American Family Insurance
FAX: (720) 941-4939

Mr. Hill:

This letter is to confirm that the U.S. Environmental Protection Agency (EPA) completed the removal and replacement of soil at 3215 Steele Street in early December, 2005. The remediation at this property will not be officially complete until EPA completes re-landscaping the property next spring. However, the soil at the property that once had levels of arsenic above EPA's removal levels has been replaced with clean soil.

Please feel free to contact me with any further questions or concerns about this property or the VB/I-70 Superfund Site cleanup.

Sincerely,

A handwritten signature in cursive script, appearing to read "Jennifer Chergo", is written over a horizontal line.
